Scripts

- 1) GameManager:- This script controls the game , its saves and loads data from the device eg:- Best Score , musics status ,etc.

Click on Reset All if made any changes.

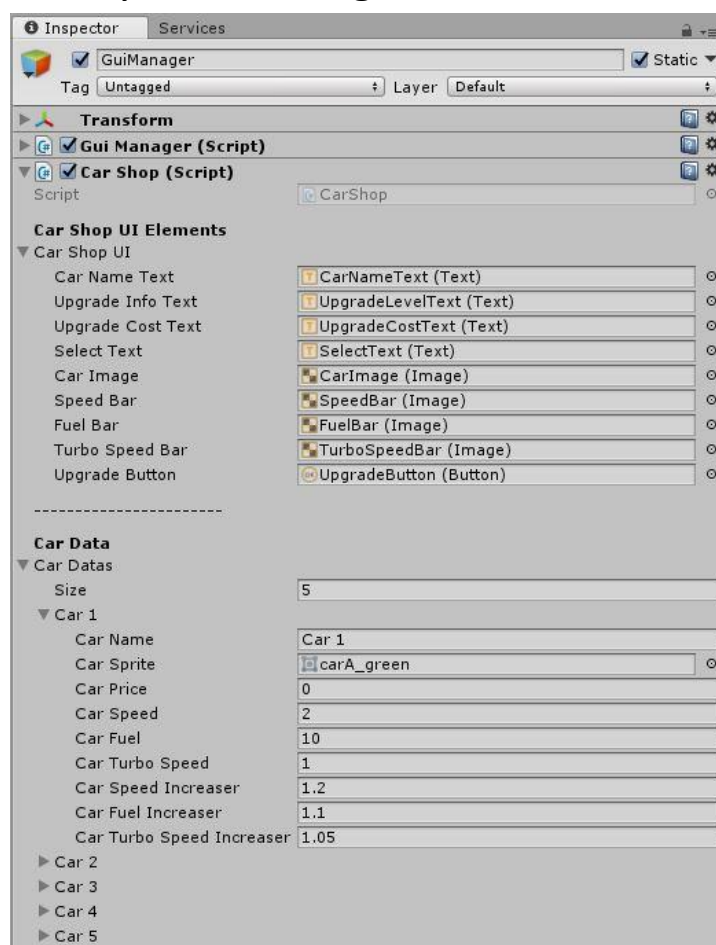

- 2) Unity IAP:- This script controls the Unity IAP for android and iOS. It controls the remove ads function.

3) ScreenShot:- This script helps player to take the screen shot of their game and share it on the social platforms like whatsapp , etc.

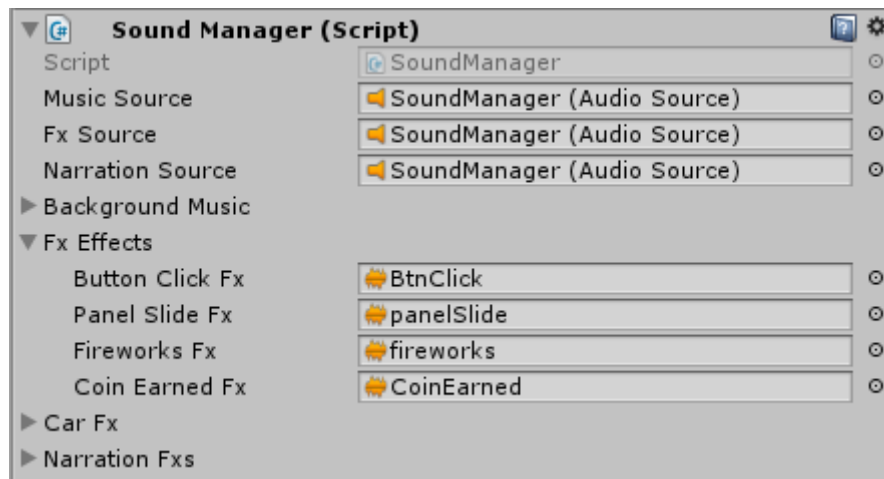

4) CarShop:- This script controls the car shop , it assigns the functions to the select buttons and updates the text like cost , etc. Here you can assign different vehicles.

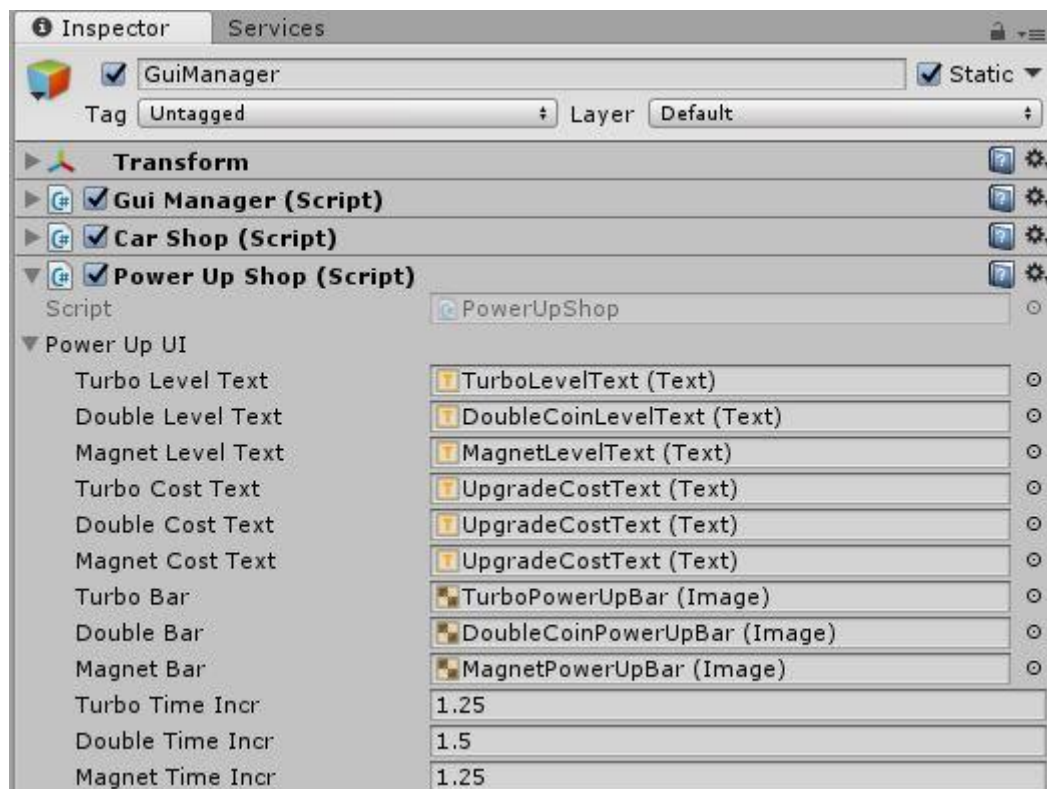

5) GuiManager:- This script controls the game menu , it assigns the functions to the buttons and updates the text, store game details, and more.

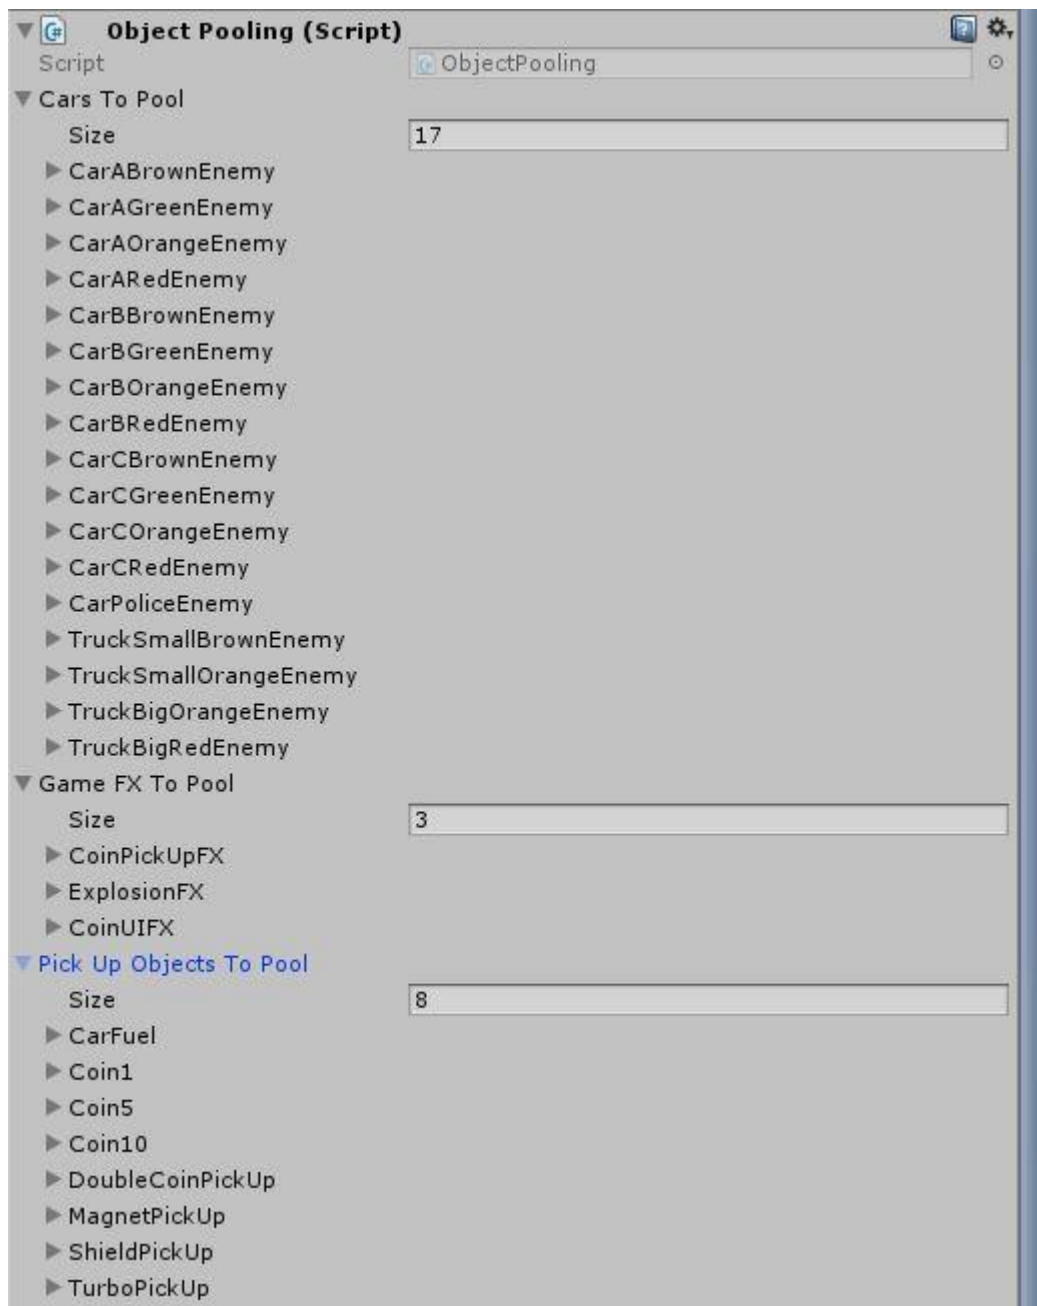

6) SoundManager:- This script manages music and sound fx of the game eg:- background music, button click sound , etc.

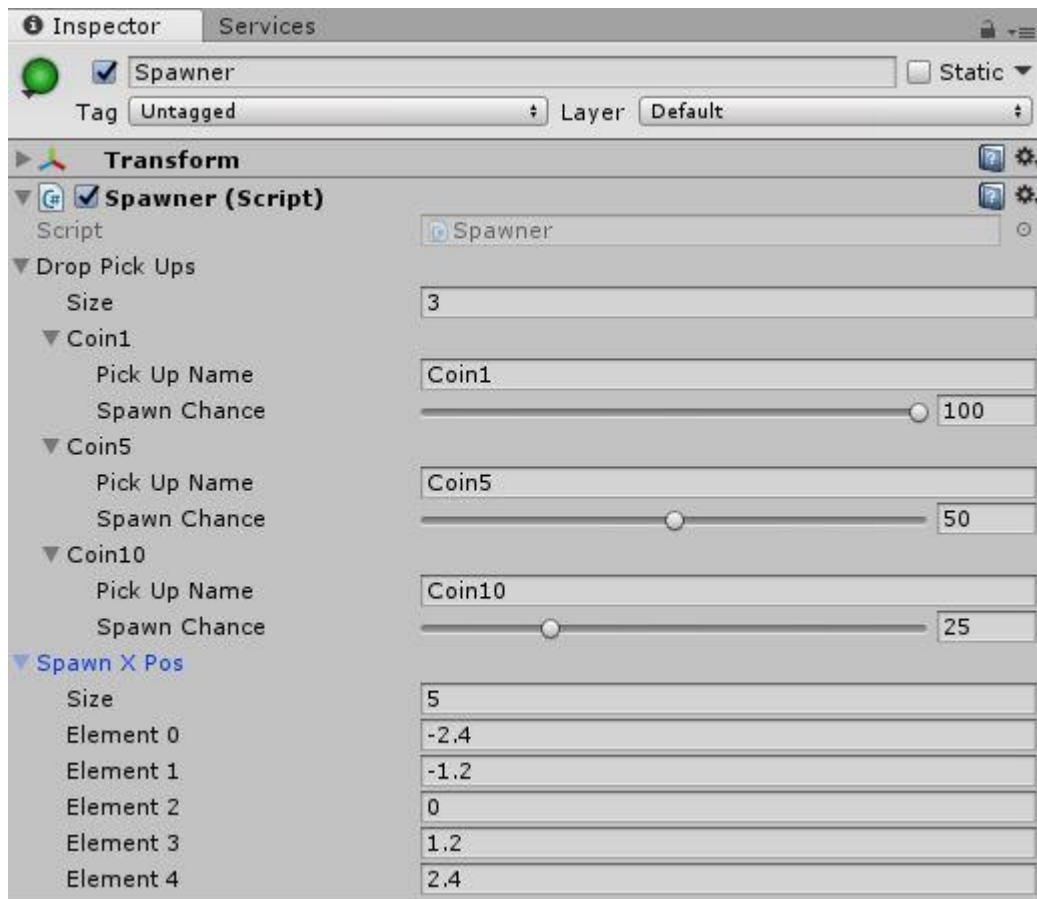

7) PowerUpShop:- This script controls the PowerUp shop , here you upgrade your powerups.

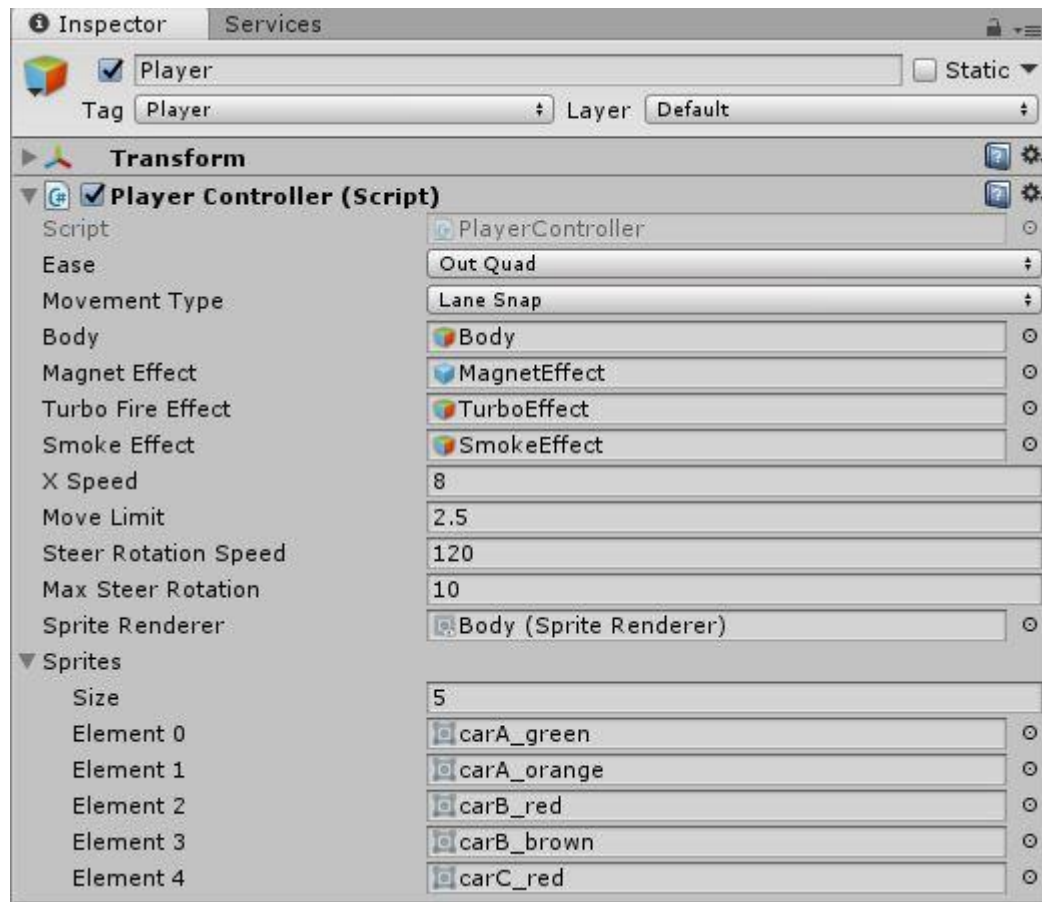

8) Objectpooling:- This script creates clone of specified gameobject at start of scene so that they can be reused in the game.

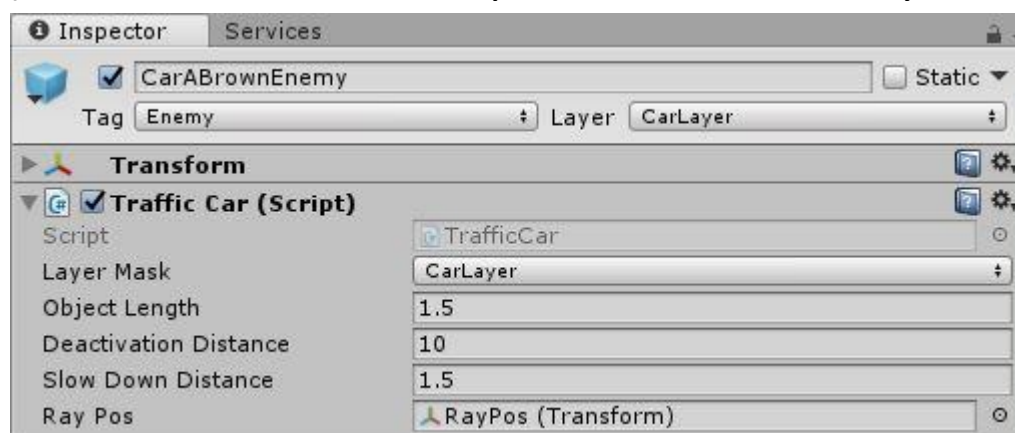

9) Spawner:- This script spawns enemy car and pickups gameobject in the scene.

- 10) **PlayerController:-** This script is attached to player car and it controls its movements.

- 11) **TrafficCar:-** This script controls the enemy cars.
